FOOD MOTH TRAP is a monitoring device (pheromone glue trap), prebaited with specific pheromone.

It is composed of:

- Cardboard plasticized on the glued face;
- Transparent hot melt glue;
- Sexual pheromone (TDDA) spread on the glue area;
- Double sided adhesive tape on the back of the trap for its positioning on the wall;
- White silicon release paper, with release instructions printed in black;
- Packed in PET-Alu-PE flowpack.

Trap size (not assembled trap):

- **Length:** 157 mm
- **Width:** 80 mm

Glue Area: 105 x 70 mm

TECHNICAL DATA SHEET

Quantity of glue on the trap surface: 0,75 g

Colour: As in the picture

InVerde products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Place Food Moth Monitor Trap in the following places:

- In the kitchens, inside pantries, on cupboards, on shelves.
- In living rooms and dining rooms.
- In all those places where food is stocked.

Suggested monitoring period: all the yearlong, especially between March and October, period in which it is possible to register an increase of this typology of pest infestation.

Suggested frequency of the controls: weekly. Change the trap after three months (at the latest) or before according to the pest infestation or the presence of dust, water and/or damp in the environment.

The use of Food Moth Monitor Trap in dusty places could undermine its efficaciousness.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%.
If well stored (intact packaging), the product shelf life is 3 years. Once opened, its shelf life is 3 months.

6. PACKAGING AND SPARE PARTS:

- 2 traps per skillet wrapped in laminated barrier film;
- 12 skillets per display (24 traps).

The packaging can be customized basing on the customer's needs.

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
