

Instructions for use

Catchmaster Rat Trap

Contents of the package:

- Catchmaster Glue Board Sticky Rat Traps

Application:

1. **Unpacking:** Carefully open the packaging and remove the adhesive traps.
2. **Separate:** Separate the traps from their packaging, ensuring that the adhesive surfaces are exposed and ready for use.
3. **Choice of location:** Choose areas where you have often observed mice or insects. Some examples of good locations include:
 - Near walls and skirting boards.
 - Under furniture and appliances.
 - In cupboards and pantries.
4. **Place the trap:** Position the trap flat or folded in the chosen location along the wall, ensuring it is easily accessible to mice and rats.
5. **Use of bait (optional):** A bait can be applied onto the glueboard to attract mice. Suitable baits consist of fatty foods such as peanut butter or chocolate spread. Apply a small amount of preferred bait onto the glue.
6. **Regular checks:** Check traps regularly, at least once a week, to detect the presence of mice or insects caught.
7. **Replacing traps:** Replace traps as soon as they are full or when their adhesive power diminishes.

Important: Keep the area as dust-free as possible, as the adhesive strength of the traps may decrease more quickly.

Safety instructions:

- Avoid contact of the adhesive surface with the skin and other sensitive surfaces.
- Keep traps out of reach of children and pets.
- Wash your hands thoroughly after using the product.

Waste disposal:

- Dispose of used traps and their contents in accordance with local waste disposal regulations.
