APPLICATION

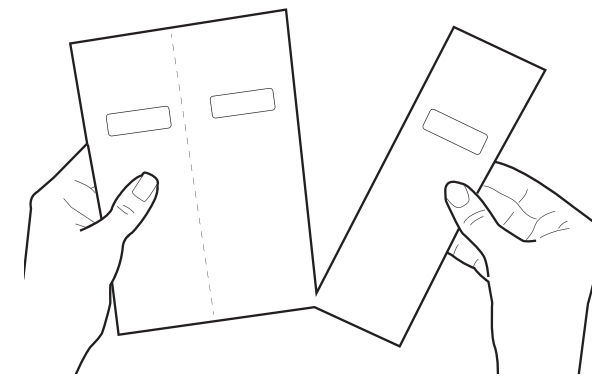

1. Unpacking:

Carefully open the packaging and remove the silverfish traps.

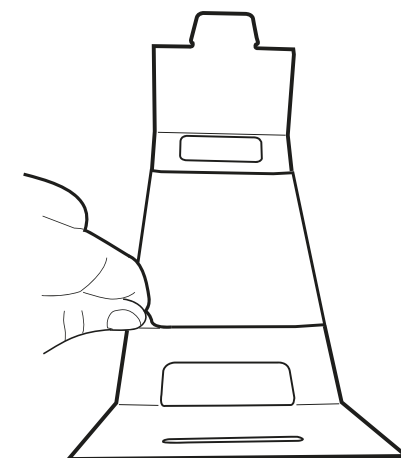

2. Separate:

The adhesive traps are supplied in sheets of 3. Carefully separate the adhesive traps from each other at the intended separation point.

3. Activate:

Remove the protective film from the adhesive surface of the trap and fold the trap according to the crease lines.

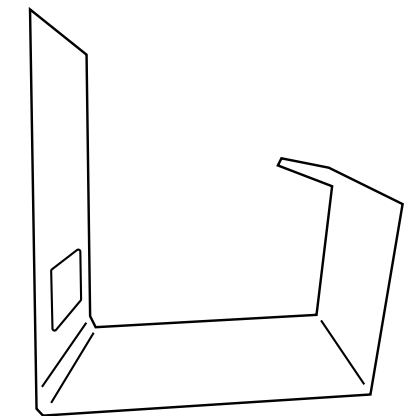

PLACEMENT OF THE TRAPS

4. Site selection:

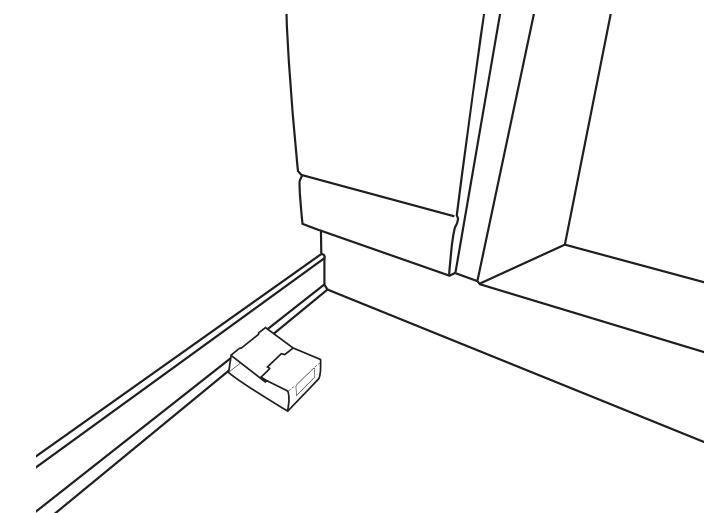

Select areas where you have frequently observed silverfish or paperfish. Examples could be the following locations:

- In bathrooms and kitchens
- Under sinks and near water pipes
- In corners and dark hiding places
- In pantries and storage rooms

5. Placement:

- Place the traps folded or flat on the floor. Make sure that the traps are not blocked by household items or furniture.
- The openings of the trap should point in the direction in which the silverfish move.
- Place at least one sticky trap in each corner. For larger rooms, we recommend distributing the sticky traps along the long sides of the room.

Important:

Keep the area as dust-free as possible, otherwise the adhesive power of the traps may deteriorate more quickly.

INSTRUCTIONS FOR USE

Regular checks:

Check the traps regularly for silverfish caught.

Change the traps:

Replace the traps as soon as they are full or when they lose adhesive strength.

SAFETY INSTRUCTIONS

- Avoid contact of the adhesive surface with skin and other sensitive surfaces.
- Keep out of reach of children and pets.

WASTE DISPOSAL

Dispose of used traps and their contents in accordance with local waste disposal regulations.
